I am a postdoctoral researcher at Cornell University, studying how to govern, evaluate, and situate AI systems and online platforms according to social, cultural, and political factors. My research combines algorithmic audits, qualitative inquiry, and accountability artifacts to examine AI across Global Majority communities, computational models in low-resource contexts, and public-sector institutions.

Publications

Note: As in many other areas of Computer Science, **leading venues in HCI and AI fairness**¹ include highly selective, extensively peer-reviewed conferences such as CHI, CSCW, and FAccT. These venues use rigorous double-blind peer review and publish full-length archival papers. Within these research communities, **such conferences often carry greater prestige, visibility, and impact than many journals**².
